

TALUS[®]

Bio-Power

TALUS an eco-friendly product derived from naturally available vegetable source.

TALUS protects the crop from pests, insects, larvae, mites, beetles and thrips.

TALUS contains vegetable amino acids, that will increase pollen germination and length of the pollinic tubes.

TALUS acts mainly on the hydric balance of the plant cells & strengthening the cellular walls in such a way that they increase resistance to unfavourable conditions.

TALUS provides required six micronutrients for optimum growth.

TALUS is a free-flowing, fine crystalline powder, which dissolves completely in water.

Dosage:

1-1.5 gram per litre of water, repeated use to obtain best yields.

Crops:

cotton, chilly, pulses, vegetables ornamental, horticulture, fruit crops all kinds of cereals /Kharif-Rabi crops.

Available Pack Size: 20gms, 50gms, 100gms & 250gms
